Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company ☒  
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

The aggregate market value of the registrant's common stock held by non-affiliates, based on the closing price of the registrant's common stock as reported on The NASDAQ Global Market on June 27, 2015, the last business day of the registrant's most recently completed second fiscal quarter, was approximately \$24.4 million. For purposes of this calculation, it has been assumed that all shares of the registrant's common stock held by directors, executive officers and persons beneficially owning ten percent or more of the registrant's common stock are held by affiliates. The treatment of these persons as affiliates for purposes of this calculation is not conclusive as to whether such persons are, in fact, affiliates of the registrant for any other purpose.

The number of shares outstanding of the registrant's common stock, as of the latest practicable date:

Common Stock, par value \$0.001 per share  
50,354,363 shares of common stock outstanding at February 29, 2016

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the definitive proxy statement for the registrant's Annual Meeting of Stockholders for 2016 have been incorporated by reference into Part III of this Annual Report on Form 10-K.

 INDEX TO EXHIBITS	

We have invested a significant portion of our research and development budget into the design of ASIC and hybrid devices, including the HyperCloud® memory subsystem, introduced in November 2009, as well as our NVvault family of products. These products are subject to increased risks as compared to our legacy products. For example:

- we are dependent on a limited number of suppliers for both the DRAM ICs and the ASIC devices that are essential to the functionality of the HyperCloud® memory subsystem, and we have experienced supply chain disruptions and shortages of DRAM and flash required to create our HyperCloud®, our NVvault™ and Planar X VLP products as a result of business issues that are specific to our suppliers or the industry as a whole;
- we may be unable to achieve new qualifications or customer or market acceptance of the HyperCloud® memory subsystem, NVvault™ products or other new products such as HyperVault™, or achieve such acceptance in a timely manner;
- the HyperCloud® memory subsystem, NVvault™ products or other new products such as HyperVault™ may contain currently undiscovered flaws, the correction of which would result in increased costs and time to market; and
- we are required to demonstrate the quality and reliability of the HyperCloud® memory subsystem or other new products to our customers, and are required to qualify these new products with our customers, which requires a significant investment of time and resources prior to the receipt of any revenue from such customers.

We experienced a longer qualification cycle than anticipated with our HyperCloud® memory subsystems, and as a result, we have not generated significant HyperCloud® product revenues to date relative to our investment in the product. We entered into collaborative agreements with both IBM and HP pursuant to which these OEMs qualified the 16GB and 32GB versions of HyperCloud® for use with their products. While we and each of the OEMs committed financial and other resources toward the collaborations, the efforts undertaken for each of these collaborative agreements have not resulted in significant revenues or product margins for us to date. As a result, we have not achieved and we may never achieve sufficient revenues or margins from our HyperCloud® products to justify their costs.

Additionally, if the demand for servers deteriorates or if the demand for our products to be incorporated in servers declines, our operating results would be adversely affected, and we would be forced to diversify our product portfolio and our target markets. We may not be able to achieve this diversification, and our inability to do so may adversely affect our business.

***We use a small number of FPGAs, DRAM ICs and NAND flash suppliers and are subject to risks of disruption in the supply of FPGAs, DRAM ICs and NAND flash.***

Our ability to fulfill customer orders or produce qualification samples is dependent on a sufficient supply of field-programmable gate arrays (“FPGAs”), DRAM ICs and NAND flash, which are essential components of our memory subsystems. There are a relatively small number of suppliers of FPGAs, DRAM ICs and NAND flash, and we purchase from only a subset of these suppliers. We have no long-term FPGA, DRAM or NAND flash supply contracts.

From time to time, shortages in DRAM ICs and NAND flash have required some suppliers to limit the supply of their DRAM ICs and NAND flash. We have experienced supply chain disruptions and shortages of DRAM and flash required to create our HyperCloud®, NVvault™ and Planar X VLP products, and we are continually working to secure adequate supplies of DRAM and flash necessary to fill customers’ orders for our products in a timely manner. If we are unable to obtain a sufficient supply of DRAM ICs or NAND flash to meet our customers’ requirements, these customers may reduce future orders for our products or not purchase our products at all, which would cause our net sales to decline and harm our operating results. In addition, our reputation could be harmed and, even assuming we are successful in resolving supply chain disruptions, we may not be able to replace any lost business with new customers, and we may lose market share to our competitors.
